REASONS FOR ALLOWANCE

This is in response to amendment filed on May 3, 2004. Claims 1, 8-11, 18-21, 24 and 25 have been amended.

Claims 1-26 are allowed.

The following is an examiner's statement of reasons for allowance: Applicant claims a method and apparatus for providing a data transfer control signal from a controller to a Digital to Analog Converter for transferring input data from input registers into latchable data registers and providing a data transfer delay signal from the DAC to the controller, wherein in a first logic state, the data transfer delay signal prevents transfer of input data from the input registers into the latchable data registers until after a transition to a second logic state occurs on the data transfer delay signal (claim 1). Claims 11 and 21 are allowed for similar limitations as in claim 1. Claim 26 is allowed for the combination of structural elements recited but not taught in the prior art as exemplified by the open-drain, bi-directional data transfer delay signals in a wire-OR configuration from the data conversion devices to the controller. Claims 2-10, 12-20 and 22-25 are allowed for the same reasons as stated with respect to their respective independent claims.

The arguments filed by the applicants are deemed persuasive with respect to the prior art in particular to that of Lewis '190. Therefore, the claims are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
